ABOUT

I am a Third-year BSIT student with foundational knowledge of full-stack development. Eager to apply technical skills, collaborate with professionals, and develop practical solutions while continuously improving problem-solving abilities.

EDUCATION

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES Sta. Mesa, Manila
BS Information Technology 2024

Honors: Consistent President's Lister (1st and 2nd Year)
Relevant Coursework: Data Structures & Algorithms, Integrative Programming, Operating Systems, Information Management, Web Development, Database Administration

EXPERIENCE

CISCO NETCONNECT PUP Sta. Mesa, Manila
Membership Lead August 2026 – Present

- Oversee membership growth, recruitment strategies, and onboarding initiatives while organizing engaging activities to strengthen member participation, community involvement, and organizational growth.

MICROSOFT CAMPUS CLUB PUP Sta. Mesa, Manila
Marketing Communications Officer September 2026 - Present

- Manage social media content, create and edit promotional materials, document events through photos and video, and coordinate with team members to strengthen online presence and community engagement.

AWS CLOUD CLUB PUP Sta. Mesa, Manila
Associate Lead for the Web Development Department (Backend Focus) – Skill Builder Department October 2026 - Present

- Develop web applications through hands-on projects and workshops, focusing on backend development, API integration, database management, and collaborative development of responsive, accessible, and user-centric solutions.

PROJECTS

SALN Submission Portal | Python (Flask), MySQL, JavaScript, Gemini 2026

- Developed a secure full-stack government ID management and submission system using Python (Flask), MySQL, JavaScript, HTML5, CSS3, and Gemini AI.

Koso Life Wear | React, Vite, TypeScript, Tailwind CSS 2026

- Developed a minimalist fashion e-commerce app with responsive layouts, accessible UI, and spring-based animations using React, Vite, Tailwind CSS, TypeScript, and AI-assisted coding with Antigravity CLI.

Axis-Studio | React 19, Three.js, Tailwind CSS, Web Audio API 2026

- Developed an interactive 3D mechanical keyboard customizer and e-commerce storefront using React 19, Three.js, Tailwind CSS, and Web Audio API with AI-assisted coding via Antigravity CLI.

PUP Room Booking Prototype | Figma, HCI principles 2026

- Co-created low- and high-fidelity wireframes and visual mapping systems for academic space management using HCI principles and Figma.
